PROPELLER  
DESIGN***

***(History & Design  
of Propellers)***

**First Edition**  
January, 1992

Second printing - April, 2000  
Third printing – March 2005  
Fourth printing – July 2006

**ISBN# 0-9780586-0-7**

*The Report and accompanying written materials are provided "as-is" without warranty of any kind including the implied warranties of merchantability and fitness for a particular purpose, even if AeroMarine Research© has been advised of that purpose. AeroMarine Research© specifically does not warrant the information in the Report, and will not be liable for any direct, indirect, consequential or incidental damages arising out of the use of, or inability to use such product even if AeroMarine Research© has been advised of the possibility of such damages. AeroMarine Research© is in no way liable for incidental, indirect, or consequential damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use the product or the provision of or failure to provide support services, even if AeroMarine Research© has been advised of the possibility of such damages. In any case, AeroMarine Research's entire liability shall be limited to the amount actually paid by you for the Report.*

## **About the author:**

Jim Russell is a professional engineer with a mechanical and aeronautics background. Currently living in Canada, he has done extensive aerodynamic research at University of Michigan, MI and University of Toronto, Canada and marine research at the NRC water channel laboratory in Ottawa, Canada. His published papers are highly acclaimed, specifically related to the aerodynamics and hydrodynamics of high performance catamarans, tunnel boats and modified vee-hulls. Russell appeared on SpeedVision's Powerboat Television as a guest expert on 'Tunnel Hulls', and was performance/design technical consultant on National Geographic's 'Thrill Zone' TV show. Russell has designed and built many tunnel boats. As a long-time professional race driver, he piloted tunnel boats to Canadian and North American championships. He has written powerboating articles for many worldwide performance magazines and has covered UIM and APBA powerboat races. Russell is the author of the "Secrets of Tunnel Boat Design" book, "History of Tunnel Boat Design" book, and the "History and Design of Propellers". His company has designed and published the well-known powerboat design software, "Tunnel Boat Design Program©", specifically for the design and performance analysis of tunnel boats, powered catamarans and vee-hulls.

Table of Contents

**1 History of the Propeller ..... 8**

1.1 In the Beginning..... 8

1.2 Engineering Theory ..... 10

1.3 The Invention of the Screw Propeller..... 13

1.4 Collision Causes Improvement..... 16

1.5 The Last Step ..... 16

1.6 The End of the Paddle Wheel..... 18

**2 How Propellers Work ..... 20**

1.7 "The Worm Turns" ..... 19

2.1 Force and Reaction ..... 20

2.2 Thrust & Momentum ..... 21

2.3 The "Aerofoil" ..... 22

2.4 Propeller parts ..... 22

2.4.1 Types of Hubs ..... 24

**3 Modern Day Propellers..... 26**

3.1 Propeller Pitch ..... 26

3.2 Propeller Diameter..... 27

3.3 Propeller Rake..... 28

3.4 Blade Section Types..... 30

3.5 Blade Thickness ..... 31

3.6 Blade Skew..... 31

**4 Advanced Propping..... 33**

4.1 Prop Slip..... 33

4.2 Types of Propellers..... 34

4.3 Three, Four & Five-Blade Props ..... 37

4.4 Cupping ..... 39

4.4.1 *What Is Propeller Cup?*..... 40

4.4.2 *Location of Cup*..... 41

4.5 Materials and Blade modifications ..... 42

4.5.1 *Propeller Materials* ..... 42

4.5.2 *Vented Blades* ..... 43

4.5.3 *Blueprinted Blades*..... 43

**5 Gear Case Design..... 46**

5.1	Water Intake .....	46
5.2	Propeller Lift .....	47
5.3	Skeg Design .....	48
5.4	Blowout.....	48
5.4.1	<i>Causes of Blowout</i> .....	48
5.5	Lower Unit Designs .....	50
5.5.1	<i>Mercury CLE</i> .....	52
5.5.2	<i>FleetMaster</i> .....	52
5.5.3	<i>Speedmaster</i> .....	53
5.5.4	<i>SportMaster</i> .....	54
5.5.5	<i>TorqueMaster</i> .....	54
5.6	More Speed.....	55
5.7	Nosecones .....	57
5.8	Propeller Design and Motor Exhaust.....	60
5.8.1	<i>Through hub exhaust</i> .....	61
5.8.2	<i>Over hub exhaust</i> .....	61
5.8.3	<i>Combination over/through hub</i> .....	61
<b>6</b>	<b>Powerboat Drive Designs: .....</b>	<b>62</b>
6.1	Lot's of "Good Try" Designs.....	62
6.2	Some made it to Limited Production.....	63
6.3	"Neat Concepts" on the Drawing Board.....	64
6.4	New Technologies: .....	64
6.5	Surface Drives .....	65
6.5.1	Here is how it works .....	67
<b>7</b>	<b>Want to get technical? .....</b>	<b>68</b>
7.1	Cavitation .....	70
7.1.1	<i>Inception of cavitation</i> .....	70
7.1.2	<i>Three modes of cavitation</i> .....	70
7.1.3	<i>What does cavitation look like?</i> .....	71
7.1.4	<i>And how does cavitation affect Me?</i> .....	72
7.1.5	<i>Performance analysis</i> .....	74
<b>8</b>	<b>Advanced Propeller Designing .....</b>	<b>75</b>
8.1	New drive concepts: One Engine Drives 2 Props.....	75
8.2	Advanced Designing Techniques .....	76
8.3	Speed Prediction .....	78
8.3.1	<i>The speed prediction formula</i> .....	78
8.4	PropWorks2© Software.....	79

## List of Figures

Figure 1 - da Vinci's 'water screws' .....	8
Figure 2 – Leonardo da Vinci.....	8
Figure 3 - da Vinci's helicopter rotor (most like a propeller design) .....	9
Figure 4 – Bernoulli's propelling 'vanes' (1752) .....	9
Figure 5 – Bushnell's "Turtle" propellers (1775).....	10
Figure 6 - William Froude (1878) .....	11
Figure 7 – Blade Element Theory [Froude 1878] .....	11
Figure 8 – Josef Ressel (1826).....	12
Figure 9 - Francis Petit-Smith (1836).....	13
Figure 10 - Propeller Screw of Francis Petit Smith 1836 .....	13
Figure 11 - Ericson Screw Propeller patent (1836) .....	14
Figure 12 – John Ericsson (1836).....	15
Figure 13 - Early propulsion devices.....	15
Figure 14 – George Rennie (1839) .....	17
Figure 15 - Paddlewheels & Screw propellers .....	18
Figure 16 - Screw-Gear boat design (1946) .....	19
Figure 17 - Propeller forces & reactions .....	20
Figure 18 - Pressure differences cause propeller Forces .....	20
Figure 19 - Acceleration of water causes Thrust .....	21
Figure 20 - Propeller aerofoil: Thrust & momentum .....	22
Figure 21 - Propeller Parts(a) .....	23
Figure 22 - Propeller parts (b).....	24
Figure 23 - Solid Hub Prop .....	25
Figure 24 - Rubber Hub Prop .....	25
Figure 25 - Propeller Pitch Measurement .....	26
Figure 26 - Land & Sea automatic pitch shifting propeller .....	27
Figure 27 - Propeller Diameter measure.....	27
Figure 28 - Modern 4-blade propeller .....	28
Figure 29 - Modern 5-blade propeller .....	28
Figure 30 - Propeller Rake (a) 'zero rake'; (b) 'positive rake' .....	29
Figure 31 - Flat Rake .....	29
Figure 32 - Propeller aerofoil section types .....	30
Figure 33 - Blade Thickness .....	31
Figure 34 - Blade Skew .....	32
Figure 35 - Propeller Slip .....	33
Figure 36 - Conventional Round-Ear Propeller.....	34
Figure 37 - Weedless Prop .....	35
Figure 38 - High-performance Round-Ear Prop .....	35
Figure 39 - Sport Cleaver Prop .....	36
Figure 40 - Chopper style prop .....	36
Figure 41 - Racing Cleaver Prop .....	37
Figure 42 - 5-blade propeller .....	38
Figure 43 - 6-blade propeller .....	38
Figure 44 - Propeller Cup .....	39
Figure 45 - Lift Distribution curves for propellers .....	40
Figure 46 - Cupping along Pitch Lines.....	41
Figure 47 - Cupping along Rake Lines .....	42

Figure 48 - Lab-Finished props can add 3-5 mph.....	44
Figure 49 - Gearcases can only take so much .....	46
Figure 50 - Modern gearcase reduces 'blowout' .....	47
Figure 51 - Nose cone & skeg modification to stock XR unit .....	50
Figure 52 - Slimmer profile of XR Drag gear case .....	50
Figure 53 - All gearcases are designed to a limit!.....	51
Figure 54 - CLE with torque tab.....	52
Figure 55 - Fleetmaster gearcase.....	53
Figure 56 - SpeedMaster #6 Gearcase .....	53
Figure 57 - SportMaster Gearcase .....	54
Figure 58 - TorqueMaster Gearcase .....	54
Figure 59 - Smaller diameter 'bullet' .....	55
Figure 60 - Fastest finish for gear cases .....	56
Figure 61 - After-market nosecone .....	58
Figure 62 - Nosecone installation .....	59
Figure 63 - Arneson surface drive .....	65
Figure 64 - Howard Arneson.....	66
Figure 65 - Surface drive technology.....	66
Figure 66 - Technical Parts of the Propeller .....	68
Figure 67 - Thrust and Torque Forces.....	69
Figure 68 - Blade pressures and cavitation region .....	70
Figure 69 - Cavitation causes bubbles .....	71
Figure 70 - Erosion caused by cavitation.....	72
Figure 71 - Cavitation can result in Thrust breakdown.....	73
Figure 72 - FEA modeling for stress analysis .....	76
Figure 73 - AeroMarine Research® software .....	79
Figure 74 - AeroMarine Research's TBDP software.....	80
